

Accessori tipo G / G type accessories

Pattino **G** a profilo semicircolare in polietilene ad alta densità molecolare, ideale per tensionare in modo economico catene semplici, doppie e triple che abbiano velocità non superiori a 0,35m/s e temperature di esercizio inferiori agli 80°C. Questo tipo di pattino è particolarmente indicato per montaggi vicino al pignone e per piccoli interassi, o in presenza di un adeguato raggio di curvatura. I kit vengono forniti completi di viteria in acciaio zincato.

G semicircular sliding block in polyethylene with an high molecular density, suitable to tension in a cheaper way simplex, duplex or triplex chains which have a speed not higher than 0,35m/s and operating temperatures lower than 80°C. This type of sliding block is particularly suitable for installations close to the pinion and for reduced interaxis, or when there is an adequate radius of curvature. The kits are delivered complete with galvanized bolts and screws.
